

FJORD™-Mg

FULLY PROTECTED MAGNESIUM

SOIL
&
FOLIAR

FJORD™-Mg

BENEFITS

DESIGNED FOR FOLIAR & SOIL APPLICATIONS

PROTECTED FROM TIE-UP IN SOIL & PLANT TISSUE

LOW USE RATES

MIXES WELL WITH MOST COMMONLY USED FERTILIZERS & PESTICIDES

SUPERIOR CROP SAFETY FOR FOLIAR APPLICATIONS

DESIGNED TO ADDRESS MAGNESIUM DEFICIENCIES IN WESTERN CANADIAN SOILS

FJORD™-Mg

FULLY PROTECTED MAGNESIUM

FJORD™-Mg is a fully protected magnesium, designed to outperform traditional magnesium fertilizers in both soil and foliar applications. In soil applied applications FJORD™-Mg doesn't tie-up in the soil like other magnesium fertilizers can. In foliar applied applications FJORD™-Mg is taken up more rapidly by the leaves - and is protected from tie-up in the plant tissue. SOLUMETRIX™ soil tests have shown that many fields across Western Canada would benefit from an application of FJORD™-Mg as many soils show a deficiency in magnesium.

NUTRIENT ANALYSIS

Magnesium (Mg) 4.0%

Derived From: Magnesium Nitrate

Net Weight: 1.24 kg/L (10.36 lb/gal)

USE GUIDELINES

RATE OF APPLICATION

Foliar & Soil Applications: 0.49 L/ha - 2.47L/ha (200mL-1L/acre). For best results follow a SOLUMETRIX™ soil test recommendation. Rates are based on general guidelines. Always read and follow label directions.

APPLICATION TIMING

Applications of FJORD™-Mg have shown the best results when applied early to mid/late season. Best foliar results and plant safety will be obtained when applications are applied early morning or late evening, when the stomata are open.

COMPATIBILITY

FJORD™-Mg is compatible with most commonly used fertilizers and pesticides. Adding additional water to tank mixes will always improve compatibility. Always establish compatibility using the standard jar test method prior to tank mixing.

STORAGE

Do not store below 0°C. Salt-out may occur if storage recommendations aren't strictly followed.
