

HARBOR™-Cu

FULLY PROTECTED COPPER

SOIL
&
FOLIAR

HARBORTM-Cu

BENEFITS:

DESIGNED FOR FOLIAR, SOIL & IMPREGNATION APPLICATIONS

PROTECTED FROM TIE-UP IN SOIL & PLANT TISSUE

LOW USE RATES

MIXES WELL WITH MOST COMMONLY USED FERTILIZERS & PESTICIDES

MIXES WELL WITH NEGATIVELY CHARGED NUTRIENTS SUCH AS PHOSPHATE

SUPERIOR CROP SAFETY FOR FOLIAR APPLICATIONS

HARBOR™-Cu

FULLY PROTECTED COPPER

HARBOR™-Cu is a fully protected copper, designed to outperform traditional Cu-fertilizers in both soil and foliar applications. In soil applied applications HARBOR™-Cu doesn't tie-up in the soil like other Cu-fertilizers can. In foliar applied applications HARBOR™-Cu is taken up more rapidly by the leaves - and is protected from tie-up in the plant tissue. SOLUMETRIX™ soil tests have shown that many fields across Western Canada would benefit from an application of HARBOR™-Cu as many soils show a deficiency in copper.

NUTRIENT ANALYSIS

Copper (Cu)..... 4.00%

Derived From: Copper Sulfate

Net Weight 1.23 kg/L (10.39 lb/gal)

USE GUIDELINES

RATE OF APPLICATION

Foliar & Soil Applications: 0.37L/ha - 1.24L/ha (150mL - 500mL/acre). For best results follow a SOLUMETRIX™ soil test recommendation.

APPLICATION TIMING

Applications of HARBOR™-Cu have shown to have best results when applied early season and during the reproductive stages. Best foliar results and plant safety will be obtained when applications are applied early morning or late evening, when the stomata are open.

COMPATIBILITY

HARBOR™-Cu is compatible with most commonly used fertilizers and pesticides. Adding additional water to tank mixes will always improve compatibility. Always establish compatibility using the standard jar test method prior to tank mixing.

STORAGE

Do not store below 0°C. Salt-out may occur if storage recommendations aren't strictly followed.
