HARBOR™-Zn

FULLY PROTECTED ZINC

HARBOR™-Zn is a fully protected zinc, designed to outperform traditional Zn fertilizers in both soil and foliar applications. In soil applied applications, HARBOR™-Zn doesn't tie-up in the soil like other Zn fertilizers can. In foliar applied applications, HARBOR™-Zn is taken up more rapidly by the leaves and is protected from tie-up in the plant tissue. SOLUMETRIX™ soil tests have shown that many fields across Western Canada would benefit from an application of HARBOR™-Zn, as many soils show a deficiency in zinc.

USE GUIDELINES

RATE OF APPLICATION

Foliar & Soil Applications: 0.37L/ha - 1.24L/ha (150mL - 500mL/acre). For best results, follow a SOLUMETRIX™ soil test recommendation.

APPLICATION TIMING

Applications of HARBOR™-Zn have shown to have best results when applied early season and mid-season. Best foliar results and plant safety will be obtained when applications are applied early morning or late evening, when the stomata are open.

COMPATIBILITY

HARBOR™-Zn is compatible with most commonly used fertilizers and pesticides. Adding additional water to tank mixes will always improve compatibility. Always establish compatibility using the standard jar test method prior to tank mixing.

STORAGE

Do not store below 0°C. Salt-out may occur if storage recommendations aren't strictly followed.
