

HARBOR[®]-B

HIGHLY EFFICIENT 6.0% BORON

SOIL
&
FOLIAR

HARBOR[®]-B

BENEFITS:

MIXES READILY WITH CALCIUM FERTILIZER INCREASING PLANT CALCIUM UTILIZATION
ADDED PROPRIETARY CARBOHYDRATES FOR ENHANCED UPTAKE
4X MORE EFFICIENT THAN STANDARD MEA BORON SOLUTIONS
SUPPLIES PLANT-AVAILABLE BORON EVEN IN ALL PH SOILS
DESIGNED FOR FOLIAR AND SOIL APPLICATIONS
PROTECTED FROM TIE-UP IN SOIL
LOW USE RATES

HARBOR[®]-B

HIGHLY EFFICIENT 6.0% BORON

HARBOR[®]-B is uniquely formulated with Soil to Cell technology, designed for cell acceptance. It supplies plant-available boron in all soils. Because of its advanced amino/carbohydrate technology, it is protected from tie-up in the soil, making HARBOR[®]-B up to 4x more efficient compared to the industry standard MEA complexes.

NUTRIENT ANALYSIS

Boron (B)..... 6.00%

Derived From: Boric Acid

Net Weight 10.26 lb/gal (1.23 kg/L)

PROFESSIONAL USE GUIDELINES

RATE OF APPLICATION

Foliar and Soil Application: 100 - 1000 ml/acre. Applications rarely exceed 250 ml/acre

APPLICATION TIMING

HARBOR[®]-B can be applied at anytime. Best results and plant safety will be obtained when applications are applied early morning or late evening, when the stomata are open.

COMPATIBILITY

HARBOR[®]-B is compatible with most commodity agricultural soil products. Adding additional water to tank mixes will always improve compatibility. Always establish compatibility using the standard quart jar method prior to tank mixing.

STORAGE

Do not store below 32°F or 0°C. Salt out may occur if storage recommendations aren't strictly followed.
