

SUMMER BURST™

PLANT POWER FOR LAWN & GARDENS

BENEFITS:

- FEEDS PERENNIAL PLANTS AND LAWNS DURING EARLY SPRING TO ENCOURAGE EARLY GROWTH**
- FEEDS ANNUAL PLANTS AND LAWNS DURING MID TO LATE SUMMER**
- HELPS PLANTS USE ENERGY MORE EFFICIENTLY**
- IMPROVES HOW WATER AND NUTRIENTS MOVE THROUGH THE PLANT**
- HELPS FRUITS AND VEGETABLES GROW BIGGER AND FULLER**
- HELPS PLANTS STAY HEALTHIER AND RESIST DISEASE**
- SUPPORTS STRONG, HEALTHY GROWTH AS YOUR LAWN AND GARDEN MATURE**

SUMMER BURST™

PLANT POWER FOR LAWN & GARDENS

Summer Burst™ feeds your lawn and annual plants during the heat of mid to late summer, when plants need extra plant energy. Summer Burst™ feeds perennial plants and lawns during early spring, when established plants need energy to recover from the winter. Summer Burst™ helps plants move water and nutrients more efficiently, improving overall growth. It also helps fruits and vegetables fill out better during key growing stages. By supporting plant health, it can help reduce stress and disease. For lawns, it provides the nutrients needed to handle summer heat and stay healthy and green.

NUTRIENT ANALYSIS

Available Phosphate (P ₂ O ₅).....	5.00%
Soluble Potash (K ₂ O).....	13.5%
Boron (B).....	0.2%
Copper (Cu).....	0.25%
Molybdenum (Mo).....	0.02%

Derived from: Potassium Hydroxide, Phosphoric Acid, Potassium Nitrate, Boric Acid, Copper Sulfate, Sodium Molybdate.

USE GUIDELINES

DIRECTIONS: Perennial Plants : Apply to established perennial plants in early spring to promote strong early growth and development.

Vegetable gardens & fruiting plants: Apply to plants at time of flowering to promote strong late season growth and development.

For best results, apply before 10 AM or after 5 PM to reduce evaporation. This product may not provide all required nutrients and should be used as part of a complete fertilization program based on soil testing.

APPLICATION: Attach to Hose: Connect the hose-end sprayer to your garden hose, ensuring the connection is secure to prevent leaks. Turn on the water and begin spraying your lawn or garden at a rate of 100–200 mL per 100 square meters. Walk at a steady pace to ensure even coverage. Apply on a calm day to prevent drift.

Overlap Spray Pattern: Slightly overlap each pass to ensure even coverage and avoid missed areas.

COVERAGE: Each 1-litre bottle contains enough product to treat 400–800 square meters. It may be used multiple times if not fully emptied.

STORAGE: Do not store below 0°C.
